🐙 MartinChetty

PROFESSIONAL SUMMARY

Software Automation Trainee at Cisco Systems with a strong foundation in Python, Java, Networking, Cloud Computing, and Generative AI. Experienced in developing AI-powered applications using LangChain, LangGraph, Agentic AI, and Retrieval-Augmented Generation (RAG), with hands-on exposure to data center infrastructure, automation workflows, and enterprise networking environments. CCNA-certified professional passionate about Software Engineering, DevOps, Network Automation, and AI-driven solutions.

WORK EXPERIENCE

Cisco Systems

Software Automation Trainee

Oct 2025 - Present

- Working with the Firepower Developer (SBGE InfraOps) team to support infrastructure operations, automation initiatives, and enterprise-scale data center environments.
- Contributing to automation solutions for IP address management and operational workflows, reducing manual effort and improving process efficiency.
- Gaining hands-on exposure to data center infrastructure, networking components, and operational best practices through collaboration with infrastructure and operations teams.
- Utilizing Python, LangChain, LangGraph, and Retrieval-Augmented Generation (RAG) concepts to develop AI-driven automation solutions and proof-of-concept applications.
- Built proof-of-concept AI applications including an AI Email Agent, Agentic Chatbot, AI Travel Planner, and AI Document Question-Answering System to strengthen practical knowledge of agentic AI architectures.
- Collaborating with engineers on AI-driven initiatives and data center operational use cases while applying software engineering and automation principles.
- Completed Cisco-sponsored technical training programs covering software automation, testing, cloud technologies, networking fundamentals, and enterprise software development.

CodeAlpha

Java Programming Intern

Jun 2025 - Sep 2025

- Developed a Student Grade Tracker GUI application using Java to manage and monitor student academic performance.
- Applied Object-Oriented Programming (OOP), exception handling, and file management concepts to build a structured and user-friendly solution.
- Enhanced problem-solving, debugging, and software development skills through project-based implementation and testing.

SlashMark

Machine Learning Intern

Feb 2024 - May 2024

- Developed machine learning models using Python and applied data preprocessing techniques to improve prediction accuracy.
- Performed data analysis, feature engineering, and model evaluation using libraries such as Pandas and NumPy.
- Built interactive visualizations and dashboards to communicate insights and support data-driven decision-making.

PROJECTS

AI Document Q&A System [🔗](#)

- Developed a production-style Retrieval-Augmented Generation (RAG) application using Python, LangChain, FAISS, and Groq LLMs.
- Implemented multi-format document ingestion, vector-based retrieval, and semantic search to provide context-aware answers from uploaded documents.
- Built an interactive Streamlit interface with source attribution, confidence scoring, and document-based question answering.

Agentic Chatbot [↗](#)

- Developed an agentic AI chatbot using LangGraph, LangChain, and Streamlit to support intelligent conversational workflows.
- Integrated web search capabilities and AI-powered news summarization using Tavily and Groq LLMs.
- Designed modular graph-based workflows to enable multi-step reasoning and dynamic task execution.

AI India Travel Planner [↗](#)

- Built an AI-powered travel planning assistant using LangGraph, LLMs, and real-world travel APIs.
- Implemented personalized itinerary generation, hotel recommendations, and conversational trip planning based on user preferences.
- Developed an interactive Streamlit application with memory-enabled conversations and multi-agent workflow orchestration.

AI Email Agent [↗](#)

- Developed an AI-powered email assistant using Large Language Models (LLMs) to generate professional email responses.
- Implemented prompt engineering and workflow automation for personalized email drafting and refinement.
- Improved productivity by automating repetitive email composition and communication tasks.

SKILLS

Programming Languages: Java, Python
AI & Generative AI: LangChain, LangGraph, Agentic AI, Retrieval-Augmented Generation (RAG), Prompt Engineering, Large Language Models (LLMs), Vector Databases, FAISS
Cloud & Platforms: AWS, Oracle Cloud Infrastructure (OCI)
Networking & Infrastructure: CCNA, Computer Networks, Data Center Fundamentals
Tools & Technologies: Git, GitHub, Jira, VS Code, Jupyter Notebook, Streamlit, OpenCV, Jenkins, GitHub Actions
Web & Databases: HTML, CSS, MySQL
Core Computer Science: Data Structures & Algorithms, Object-Oriented Programming (OOP), DBMS, Operating Systems

CERTIFICATIONS

- Cisco Certified Network Associate (CCNA) [↗](#)
Cisco AI Technical Practitioner [↗](#)
Complete Agentic AI Bootcamp with LangGraph and LangChain – Udemy [↗](#)
Generative AI with Large Language Models – Coursera (AWS & DeepLearning.AI) [↗](#)
Software Automation Testing Program – Simplilearn (Cisco Sponsored) [↗](#)
Full Stack Web Development – Tap Academy [↗](#)
Oracle Cloud Infrastructure (OCI) AI Foundations Associate [↗](#)

EDUCATION

Sri Venkateswara University		
Bachelor of Technology (B.Tech) in Computer Science and Engineering - CGPA: 8.33/10		2021 - 2025
Narayana Junior College		
Intermediate (MPC - Mathematics, Physics, Chemistry) - CGPA: 9.73/10		2019 - 2021
Saint Joseph's (E.M.) High School		
Secondary School Certificate (SSC) - CGPA: 9.3/10		2018 - 2019

LANGUAGES

- English** Professional Proficiency
Tamil Native Proficiency
Telugu Native Proficiency
Hindi Working Proficiency
